My Expertise

I'm Hammad Tariq, a Top Rated Plus Full-Stack Developer with over 10 years of experience in mobile, web, and backend development. I help businesses build cross-platform apps, scalable web platforms, and secure backend systems that deliver real business value.

From startups to enterprises, I've led projects that combined Flutter/Dart for mobile, modern web frameworks, and Firebase/Supabase/GraphQL/REST APIs for backend integration, ensuring seamless end-to-end solutions.

Featured Projects

Mobile App (Fintech)

telenor

A next-generation telecom companion app built for millions of users to manage mobile services, packages, and payments. I contributed to its design and development, focusing on seamless user journeys, scalable architecture, and improved customer engagement.

Mobile App (Fintech)

Zand

Developed for UAE's first fully digital corporate bank, this app empowers enterprises with secure, fast, and intuitive banking. From real-time payments and approvals to smart dashboards, I worked on its development and workflows to make digital banking simple yet powerful.

UX/UI

CRM Dashboard

Built for a leading UAE real estate agency, this CRM dashboard simplifies property and lead management.

With a clean, intuitive UI/UX, it empowers agents and managers to track listings, monitor client interactions, and streamline sales pipelines — all in one centralized platform.

Full-Stack Development

MMS
MACHINE MONITORING SYSTEM

MMS is an industrial machine monitoring platform with full IoT integration, designed to work with all types and ages of equipment—including legacy machinery.

It gives you real-time visibility of machine utilization and performance, lets you track tool usage, and enables data-driven improvements.

Mobile App (Fintech)

easypaisa

Pakistan's leading mobile wallet and payments platform — enabling users to send money, pay bills, recharge, and shop with ease. I worked on the app's design and development, ensuring financial transactions remain effortless, secure, and accessible to millions nationwide.

Mobile App (Game)

Quaff Quiz
THE GAME

Engage, compete, and learn — in real time.

Quaff Quiz is a multiplayer trivia game featuring live quizzes, dynamic leaderboards, and social competition elements.

I built out full UI/UX design, front-end & back-end development so players can dive in seamlessly, challenge friends, and see how they stack up globally.

Full-Stack Development

DTEK

Transforming retail with AI-powered automated checkout solutions.

Their flagship product, SWIFT, lets customers place items on a counter, have them instantly recognized (in less than 200 milliseconds), and check out in under 30 seconds.

Having raised ~US\$20M to date, the company operates across 7+ markets and aims to reduce checkout queues, lower labor cost, and improve in-store operations for retailers.
